Choral Festival Network

international
platform
for choral
competitions
and festivals

the idea...

In 2005 we started our Choral Festival Network, which stands for:

- fairness and transparency • information • communication • mutual advertising • international exchange**

Our basis are the „Quality guidelines for International Choral Festivals and Competitions“

CFN is a network of qualified International festivals and competitions, which want to give fair and transparent participants' conditions to choirs and individuals. CFN is also the official partner for festivals and competitions of the International Federation for Choral Music (IFCM).

CFN is a working network – the CFN database provides information on competitions and festivals worldwide to everybody

CFN is a working tool for the daily work of festival directors and –organizers and choral conductors who like to join festivals and competitions

excerpts of the Quality guidelines:

...The organiser must publish the competition rules, that have to clearly specify: conditions for participation, rules for the selection, competition categories, compulsory works, time and content of the performance....

the organiser must provide clear identification details (profit- or non-profit making/ postal address and all means of communication) - an organiser which also acts as a travel agent for the participant shall respect all the rules laid down in the IATA licenses

The participant must be accurately informed about the flat fee to be paid to the organiser. The organiser must specify the costs of accommodation, meals, transportation, music programmes and general administration.....
